

## Technical Bulletin

**TTA100558**

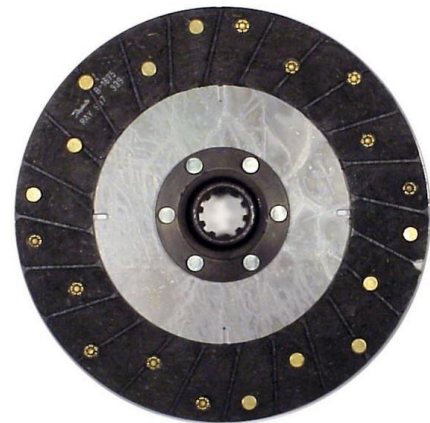

### TekTips to Assist the Installer with Trouble-Free Installations

Heartland Clutch part A100558 is a 9" cover assembly with six mounting bolt holes grouped two in three sections. The release levers have adjusting screws in the tips at the release bearing contact area. Because of the adjusting screws this cover is used with a rigid, non-dampened disc. If used with a dampened disc such as 280604 the adjusting screws may contact the disc dampener at full bearing travel causing gear clash, non-release, and possible destruction of the disc. For that reason, A100558 is recommended to be used with our A100756 rigid, non-dampened disc.
